

SAFETY OF FUNDS

SECURITY, TRANSPARENCY, AND INTEGRITY

TECHNICAL EDGE – SYSTEM INTEGRITY AND SECURITY

Our dedication to you and your hard earned money is a fundamental guideline at Investlite. Keeping a safe and secure system for trading is especially important us. That is why depositing and withdrawing your funds is made with the highest security measures.

WE COMBINE ADVANCED SAFETY SAFEGUARDS

METHODS:

- Secure connection - sophisticated firewalls and Secure Sockets Layer (SSL) encrypts and protects data transmitted to and from our servers
- Transactions are moderated by Level 1 PCI compliance services
- Our trading servers are all working from SAS 70 certified server centers
- Data flow to and from our site is always encrypted

SEGREGATED ACCOUNTS

EU financial regulations state that client funds must be segregated from the company's funds, and must be monitored every day.

CUTTING-EDGE SAFETY INFRASTRUCTURE

Investlite's R&D team maintains the strictest of safety protocols to ensure site and platform integrity.
